EXPERIENCE

AI Tech Cloud Network, Remote — AI Engineer / Full Stack Developer

Feb 2025 - PRESENT

- Architected a Python based AI agent orchestrator which can tap into an array of API tools, MCP servers and Human-in-the-loop simplifying automation.
- Developed 25+ Specialized AI agents for diverse use cases. Utilized DuckDB as an intermediate SQL layer for massive API responses allowing agents to query targeted data, effectively bypassing LLM context limits.
- Developed “[Forge](#)”, a visual workflow automation platform primarily architecting the backend and a specialized Meta-Agent for natural language workflow generation, while contributing to the visual interface design.
- Managed full-stack deployment pipelines with Supabase, Docker, Railway and Vercel services.

Deloitte USI, Bangalore — Analyst

Jan 2023 - Feb 2025

- Delivered end-to-end solutions for integration from Salesforce to Netsuite using Boomi, collaborating with over 5 cross-functional teams to ensure accurate data transfer and system compatibility.
- Developed and optimized 20+ SuiteScripts (JavaScript) to automate processes.
- Created 100+ user stories and 30+ test scripts in Jira for E2E integration.
- Built a custom SuiteBilling solution, to address a critical business need that was not available natively in Netsuite.
- Collaborated in the initiation of Netsuite AI automation efforts.

PROJECTS

OhSnap! — Farcaster Indexer

- Engineered a high-throughput Farcaster indexer utilizing a sharded Kafka data pipeline, alongside developer APIs and a real-time visualization dashboard to stream network activity with low latency.

TouchBaseIndia — Built at Based India 2024

- Developed a platform that abstracts blockchain complexities enabling users to connect, chat and transfer funds using farcaster or base identities.

ANT Protocol — MUC based funding platform

- Engineered a decentralized, serverless project funding forum utilizing Marginal Utility Curves for impact assessment, leveraging GitHub Gists and Farcaster Casts to create a transparent data layer.

Quatro — PVP Trivia built in Swift

- Engineered a high-speed PvP trivia application for iOS using Swift, featuring real-time duels, rotating daily challenges, and global leaderboards.

SOFT SKILLS

Communication
Problem-Solving
Attention to Detail
Adaptability
Collaboration
Critical Thinking

AWARDS

Secured 2nd prize in MECLABS, an Intra-College project presentation.

Spot award and Applause award for excellent performance in 2 different projects.

TECHNICAL SKILLS

NextJs
Kafka
Python
NodeJS
SQL
DuckDB
React

EDUCATION

Model Engineering College,
Kochi — B.Tech

(Bachelor's in Electronics and
Communication Engineering)

June 2018 - May 2022

Silver Hills HSS, Kozhikode —
High School

May 2018

POSITIONS OF RESPONSIBILITY

Training Cell Coordinator, Govt.

Model Engineering College.

Marketing Team Sub-head, EXCEL

2020, the techno-managerial fest
at MEC.

HOBBIES

Marathon
Gaming
Cycling
Reading
